

Illinois Braille on Demand Program

Any voter who is blind, or has limited vision, can now request that their local county clerk and/or election office provide them with election material in alternative formats. A list of the information that should be available includes but is not limited to: “Local voting or registration instructions; Sample Ballots; Public Notices; Voter machine operating instructions; Information on candidates and candidate bios; and any other information made available to voters generally.” In addition, information in braille or alternative formats is also available relating to election judges and their duties, preventing voter fraud, voter assistance for persons with disabilities, and voting in the hospital.

To obtain any of the above information you should contact your local county clerk and/or election office. Braille materials requested should be sent to your residence or the local election office within 30 days.

Individuals with questions about the Braille on Demand Program should contact the Illinois State Board at (217) 782-4141.
